Release No. 09.07.17

The Global Brake Safety Council is pleased to announce its newest member, Mr. Ian Featherstone of TMD Friction

INFORMATION RELEASE - SEPTEMBER 7, 2017

Ian's long history of accomplishments in the brake industry cover the entire range of automotive brake products and assignments in both Europe and North America, beginning with Commercial Vehicle applications in Great Britain. Today, as the Director for Research and Development for TMD AM, he oversees the ongoing evolution of TMD's global portfolio of Aftermarket brake products, with the responsibility of developing products that meet the demanding levels of performance and safety needed for success in all of TMD's world-wide markets.

"In a constantly evolving automotive market it is our job as friction experts to give end users products which meet the highest standards of safety and environmental regulations," stated Ian. "It should be our aim/duty as industry leaders to insist on legislation that promotes best practise and consistent product control."

Scott Lambert, current chairman of the GBSC, commented that, "Our council continues to experience extraordinary membership growth that is representative of the global leaders of our industry. Ian brings a wealth of knowledge that will complement our council's ability to offer solutions that ensure driver safety."

About the GBSC

The Global Brake Safety Council (GBSC) was established with the intent to uphold the highest standards for brake safety and is dedicated to responsible manufacturing in the automotive industry. Utilizing over 175 years of combined industry experience, this group of technical experts is composed of: professional engineers, OE design engineers, product development, and R&D professionals. This team is committed to raising awareness of issues that are critical to public safety through education. To learn more about the GBSC please link through to our website at:
